Aishwarya Vollala

Hyderabad, India | aishwaryavollala007@gmail.com | linkedin.com/in/aishwarya-vollala | github.com/aishwaryaV007

SUMMARY

Computer Science (Data Science) undergraduate (CGPA 9.06) with a strong foundation in Python, Java, C, DSA, DBMS, and operating systems. Co-founder and backend developer of CodeVault (patent applied), owning authentication, coding-platform integrations, and the PostgreSQL data layer across 170+ commits. Builds ML and data projects with PyTorch, XGBoost, and Pandas, and mobile apps with React Native.

EDUCATION

Sreenidhi Institute of Science & Technology 2024 – 2028 (Expected)
B. Tech in Computer Science and Engineering (Data Science) CGPA: 9.06 / 10

TECHNICAL SKILLS

Languages	Python, Java, C, SQL, JavaScript (basic), HTML5, CSS3
Core CS	Data Structures & Algorithms, DBMS, Operating Systems
Frontend & Mobile	React.js, React Native, Expo
Databases	PostgreSQL (Row-Level Security), MySQL, MongoDB, Redis, Supabase
AI / ML & Data	PyTorch, Hugging Face, XGBoost, OpenCV, Pandas, NumPy, Power BI, Prompt Engineering
DevOps & Tools	Git, GitHub Actions (CI/CD), Docker, Render, Vercel, EAS Build, Postman, LiveKit, Cloudinary, Twilio

EXPERIENCE

Data Science Intern, Unlox Mar 2026 – May 2026

- Completed the data science program (Python, SQL, Excel dashboards) through weekly assessments and mini projects.
- Built a Social Media Analytics dashboard in Streamlit on YouTube data: a Random Forest model to predict video reach, comment sentiment analysis, and t-test based A/B testing of title formats.

Data Science Intern, SkillCraft Technology May 2026

- Cleaned and explored the Titanic dataset (missing values, survival by gender, class, age, and fare) and visualised World Bank population data using Pandas, Matplotlib, and Seaborn.

PROJECTS

CodeVault – Coding Analytics & GitHub Auto-Sync Platform | *Patent Applied* Jun 2026 – Present
Node.js, Express, PostgreSQL, Redis, React, Docker

- Co-founded and co-built a platform that unifies LeetCode, Codeforces, CodeChef, and HackerRank stats into one dashboard and auto-syncs accepted solutions to GitHub; 170+ commits.
- Owned the web backend: GitHub OAuth login, platform connections, stats aggregation, public profiles, and DB schema.

ExamShield – AI Handwritten Answer-Sheet Evaluator | GitHub Jul 2026 – Present
Team Project · Python, PyTorch, TrOCR, XGBoost, React Native, Expo

- Offline AI system that auto-grades scanned handwritten answer sheets with question-wise marks, using TrOCR and XGBoost.
- Built the React Native (Expo) mobile app to scan answer sheets and view graded results.
- Refactored the Python grading pipeline, fixed the GitHub Actions CI, and led competitor research and the pitch deck.

SpotLet – Map-Based Rental Discovery App May 2026 – Present
React Native, Expo, Supabase, Google Maps API, Cloudinary, Twilio

- Digitised "To-Let" boards onto a live Google Map with colour-coded pins for houses, PGs, flats, and rooms.
- Implemented phone-OTP login with Supabase Auth and Twilio, photo uploads, and real-time availability; shipped to Android, iOS, and Web.

POSITIONS OF RESPONSIBILITY

Board Member & Student Ambassador, IIC | Manage the college innovation cell Present

Data Guide, Infinitix | Mentor students in Python, data analysis, and visualization Mar 2026 – Present

Team Leader, Smart India Hackathon | Led a 6-member team that cleared the internal round Aug 2025

ACHIEVEMENTS & CERTIFICATIONS

- **Patent:** Patent application filed for CodeVault.
- **Hackathons:** IEEE Hackathon, Hack The Matrix, CodeStorm, Smart India Hackathon (cleared internal round as Team Leader).
- **Certifications:** Microsoft Power BI; NPTEL – Design and Analysis of Algorithms.
